

## AIA & IDCEC – Continuing Education System

### AIA& IDCEC / CES Registered Provider Program Summary

<b>PROVIDER:</b>	Skyfold	<b>PROVIDER #:</b>	J756
<b>PROGRAM:</b>	Flex Your Space / Automated Operable Partitions (SKY – 0008)		
<b>LENGTH:</b>	One (1) Hour	<b>CREDITS:</b>	LU / HSW

In this seminar, design professionals, general contractors, owners or facility managers will gain a thorough understanding of flexible spaces using automated operable partitions. We will compare and contrast solid and glass partitions, understand the acoustics in flexible spaces and cover structural needs, cost and life cycles.

#### Learning Objectives:

1. To recognize the advantages of automated flexible spaces to manage spaces more effectively and efficiently. Automation makes flexibility easy.
2. To compare horizontal and vertical solid and glass automated partition, including sizes, acoustical and finish options, and safety measures.
3. To understand the acoustical separation (how sound moves) as it relates to flexible spaces and partitions – discussing STC, NIC and surrounding construction.
4. To understand the storage and structural considerations of these dynamic systems and the impact on overall design.
5. To compare overall cost implications – both initial and life cycle. Selecting products with an eye to overall cost to the client and also to the environment.

#### How Taught:

The CES Facilitator will determine the specific learning objectives of the experience level of the audience. Using a presentation, the facilitator will address the learning objectives above. Interaction with the attendees is asked for throughout the presentation. Questions during the presentation are welcome

**Needs:** Electric power and LCD screen or projector and screen. Facilitator will provide laptop or USB key.

#### Audience:

Architects, interior designers, specifiers, owners, facility managers, building operators, and other design professionals in the commercial market. Ideal audience size is 6-50.

#### Facilitator Qualifications:

All Skyfold RSMs (Regional Sales Managers) or Skyfold authorized distributor presenters receive formal training on CES guidelines, presentation skills, and this particular presentation and are certified by Skyfold to deliver this program.
